

Southern Land is a medium sized consultancy with a head office in Wanaka and smaller offices in Queenstown and Auckland. We are seeking a **Senior Chartered Professional Engineer** to join our thriving team in Wanaka or Queenstown.

What do we do?

We are working on a range of exciting rural, urban and commercial projects. We're experiencing strong growth and have a solid 5-15 year pipeline of work, offering permanent jobs and the opportunity to make your mark. Our current work covers the full range of land development, from resource management planning to project management, cadastral surveying to civil design and engineering.

What do we offer?

A stable home base in New Zealand's beautiful adventure playground, highly competitive pay rates, a fun and friendly working environment and a team of experienced professionals.

What work will you do?

You will be involved in civil engineering design and construction oversight, with a particular focus on roading and three waters. You will provide technical expertise and support to our Civil Designers/Engineers and act as Engineer to the Contract under NZS3910 where appropriate. Opportunities exist to broaden the scope of our engineering practice, depending on your skills and experience.

What are we looking for?

You'll have a relevant tertiary qualification, C.P.Eng registration and considerable New Zealand experience in roading and three waters design. You'll focus on client outcomes and have the ability to manage a project, being both hands-on and stepping back to see the big picture. 12d and AutoCAD experience is advantageous. You must have New Zealand residency or a valid New Zealand work visa.

Interested? Send your CV and cover letter to contact@southernland.co.nz.
